

Dear Federal Communications Commission.

I am a XM radio listener, and when I heard about NAB's petition 04-160, I thought it was just ridiculous. Rather than trying to lobby against something, that has a much better service, I feel they should try to improve their services.

There are much more pressing issues that congress and the FCC needs to contend with, including BPL that congress and FCC should not be wasting any time on this issue, and just put a close the the petition.

Further more, I pay for the XM services I listen to, and I should not be limited to what I get to listen to.

Thank you,

Mark Verhoeven
